Contact Adalberto for the San German data.

I need to check my files to see which is the last set of data for the Cabo Rojo PWS (I think I requested PRASA data on February but I'm not sure). I'll get back to you; although, it may take a week since I plan to contact PRASA for the latest reports.

Hi Denise,

Would you be able to help me answer the following:

- Are you all still getting DW data from PRASA for Cabo public drinking water system? In one of my reports, I have to verify that they continue to do routine sampling. They don't have anything available on the web, so figured I ask you before calling PRASA.
- Do you know anything about the samples taken at San German? I think someone said this was done the same time as Cabo Rojo back in March ? I wanted to get a copy of those results too so we could do a summary review of the data as we did with Cabo.

Thanks!

Elena
